2020 INTERIM RESULTS, INTERIM DIVIDEND AND CLOSURE OF REGISTER OF MEMBERS

HIGHLIGHTS

Charles Li, Chief Executive said:

"HKEX had a very good first half, set against a turbulent and volatile macro backdrop, reporting record half-yearly revenue and other income, and profit. High Cash Market turnover, record Stock Connect volumes and a notable number of IPOs, including a number of sizeable secondary listings, offset softness in investment income which was impacted by swings in global portfolio valuations during the period.

We remain on track with our Strategic Plan 2019-2021, well-placed to capture future growth opportunities, and fully focused on managing our costs and risks. With robust trading volumes, a strong IPO pipeline, and an expanding product portfolio, including the suite of newly launched MSCI index futures, I am confident that HKEX will continue to play a major role in connecting China and connecting the world."

Strategic Highlights

- Hong Kong's IPO market ranked second globally by number of IPOs in 1H 2020 (with 64 new company listings, including the secondary listing of NetEase, Inc. and JD.com, Inc.); and third globally by IPO funds raised (\$92.8 billion). An innovative virtual IPO ceremony option was introduced for newly listed issuers
- Stock Connect Northbound and Southbound ADT reached record half-yearly highs of RMB74.3 billion and \$20.7 billion respectively
- Bond Connect reached its 3rd anniversary in July, with ADT reaching a record half-yearly high of RMB19.9 billion, tripling that of 1H 2019
- ADT of Exchange Traded Products (ETPs) reached \$7.1 billion, 34 per cent higher than in 1H 2019. New initiatives, together with stamp duty waiver on stock transfers paid by ETP market makers, will support continued volume growth
- Major agreement signed to license a suite of MSCI indexes in Asia and Emerging Markets for the introduction of 37 futures and options contracts, 33 of which were introduced in July and August 2020
- New product launches included: USD and CNH Silver Futures, the first Iron Ore Futures ETF, the first commodity-based L&I Product, the first active equity ETF, and the first four A share L&I Products
- The LME introduced new rules on optimising its warehouse network on 1 February 2020
- HKEX Foundation and its first flagship charity partnership programme were launched, in celebration of HKEX's 20th listing anniversary
- HKEX announced plans for its new Sustainable and Green Exchange (STAGE)

Financial Highlights

- 1H 2020 revenue and other income was 2 per cent higher than 1H 2019, a half-yearly record high
 - Core business revenue was up 13 per cent against 1H 2019, driven by a 20 per cent increase in headline ADT, resulting in higher trading and clearing fees
 - Stock Connect revenue and other income reached a record half-yearly high of \$743 million, up 46 per cent against 1H 2019
- 1H net investment income fell \$681 million, primarily due to the fair value losses of collective investment schemes previously announced at Q1, as a result of the significant global market sell-off in March 2020
- Operating expenses were 6 per cent higher than 1H 2019, attributable to annual payroll adjustments and increased headcount arising from the acquisition of BayConnect in June 2019, and higher IT costs and professional fees
- EBITDA¹ margin was 76 per cent, 1 per cent lower than 1H 2019, but 1 per cent higher than the 2019 financial year
- Profit attributable to shareholders was a half-yearly record high of \$5,233 million, 1 per cent higher than 1H 2019

¹ For the purposes of this announcement, EBITDA is defined as earnings before interest expenses and other finance costs, taxation, depreciation and amortisation. It excludes the Group's share of results of the joint ventures.

* New record half-yearly high in 1H 2020

² Chargeable ADV excludes administrative trades (Admin Trades) and other non-chargeable trades. Admin Trades were introduced in 2017 to meet requirements resulting from Markets in Financial Instruments Directive (MiFID) II.

CHAIRMAN'S STATEMENT

The global economy in the first half of 2020 has been hit hard by the COVID-19 pandemic, resulting in widespread economic malaise and social fragility. Global financial markets have been characterised by extreme levels of volatility, driven by the uncertainties of the pandemic, rising tensions in Sino-US relations and geopolitical challenges, particularly in the Middle East and Asia.

Against this unprecedented and volatile backdrop, our markets have demonstrated resilience and we have made solid progress against our Strategic Plan 2019-2021.

In the first half of 2020, the average daily turnover in Hong Kong's securities market (\$117.5 billion) increased by 20 per cent year-on-year; and the average daily volume of futures and options traded in the derivatives market (1,175,231 contracts) was broadly in line with the same period last year. Hong Kong's IPO market demonstrated further momentum in Q2 2020, including the notable secondary listings of NetEase, Inc. and JD.com, Inc., bringing the total IPO funds raised for the first six months of 2020 to \$92.8 billion. Stock Connect continued its strong growth in the first half of 2020, with new turnover records set in both Northbound and Southbound Trading. Bond Connect trading volumes also saw record-highs with average daily turnover reaching RMB19.9 billion, up 202 per cent year-on-year.

In the UK, in response to the pandemic, in March 2020 the LME successfully implemented temporary contingency measures, including fully electronic pricing and trading. Chargeable average daily volume of metals contracts traded on the LME was 1 per cent higher than the volume in the first half of 2019, reflecting a strong first quarter driven by market volatility, offset by a weaker second quarter as traders withdrew capital and waited to understand the full impact of the pandemic on commodity markets.

For the six months ended 30 June 2020, the Group recorded consolidated revenue and other income of \$8,782 million and profit attributable to shareholders of \$5,233 million, up 2 per cent and 1 per cent, respectively, against the corresponding period in 2019. The Board declared an interim dividend of \$3.71 per share, representing 90 per cent of the profit attributable to shareholders, which will be payable wholly in cash without a scrip alternative.

The major update to our listing rules in April 2018 has substantially increased our global competitiveness and has continued to attract more listings of high growth biotech and new economy companies to Hong Kong during the first half of 2020. The growing trend of US-listed Chinese companies, seeking secondary listings on the Exchange has brought, and will continue to bring, diversity and vibrancy to Hong Kong's capital markets. In January 2020 we looked to continue this momentum with a market consultation seeking views on allowing corporate entities to benefit from weighted voting rights, subject to additional conditions and investor safeguards. We will consider the market feedback carefully before deciding on the way forward. To further modernise and enhance the competitiveness of our listing regime, we published a consultation paper in July seeking feedback on proposals to introduce a paperless listing and subscription regime, the online display of documents and a reduction of the types of documents on display.

On the derivatives front, in May 2020 we announced a significant licence agreement with leading global index provider, MSCI Inc., to introduce futures and options contracts on a suite of MSCI's Asia and Emerging Markets indexes to Hong Kong's markets. This is a major development for Hong Kong, and reflected our commitment to build the breadth, depth and attractiveness of our markets. It also signalled strong endorsement of both HKEX and Hong Kong as an international financial community. In July, OTC Clear became the first clearing house to offer clearing services of Hong Kong Dollar Interest Rate Swap contracts benchmarked to the Hong Kong Dollar Overnight Index Average (HONIA) reference rate. To further enrich our product diversity and promote Hong Kong as Asia's premier Exchange Traded Products (ETPs) market, we introduced the first iron ore futures ETF in March 2020; the first Gold Futures Leveraged Product in June; the first A-share Leveraged and Inverse Products in July; all in addition to the new initiatives introduced

to increase pricing efficiency and liquidity of Hong Kong listed ETPs. We also launched USD and CNH Silver Futures contracts in June, further expanding our commodities product suite and enhancing our physical delivery capability. The shortening of the listing cycle of structured products from five trading days to three trading days, effective July, has also helped increase product choice for investors, while enhancing market efficiency on product issuance.

As part of our commitment to sustainability, we confirmed our launch plan for HKEX's Sustainable and Green Exchange, "STAGE", later this year: this pioneering new information platform will promote the development of the sustainable and green finance ecosystem in Hong Kong and Asia. The LME issued a well-received discussion paper in August 2020 seeking views on proposals to drive forward its sustainability agenda. The LME plans to launch new contracts to support the recycled, scrap and electric vehicle industries in their transition to a sustainable economy, and introduce an LMEpassport, a digital register that enables voluntary market-wide transparency over sustainability criteria. The LME also plans to establish a spot trading platform for price discovery and trading of low carbon aluminium.

To ensure that our markets remain robust and competitive, the first phase enhancements for the Volatility Control Mechanism, including expanding stock coverage with tiered triggering thresholds, was implemented in May 2020. The Master Special Segregated Account service was launched in July to enhance our service to support Stock Connect. Following publication of the conclusions of our joint consultation with the SFC and the Federation of Share Registrars Limited in April 2020, we are now working with the market with a view to implementing the uncertificated securities market regime from 2022.

The LME issued two notable discussion papers: in June 2020 it sought views from market participants on its proposal to adopt a dematerialised warranting structure to streamline the warrant lodgement and withdrawal process; and in July it also issued a market-wide discussion paper regarding the proposed development of its electronic options market to modernise and enhance its market for the benefit of end users.

Throughout the period, we remained focused on building our technological capabilities, and continued to leverage the work of the HKEX Innovation Lab to explore and deploy innovative solutions across the Group in support of our strategic priorities.

Details of our progress in various initiatives are set out in the Business Review section of this announcement.

As Asia's premier exchange group, HKEX has had a more relevant and vital role to play than ever before in driving sustainable growth in our markets and in supporting our community during this incredibly challenging period. The official launch of the HKEX Foundation, together with its flagship HKEX Charity Partnership Programme and its first university scholarship programme, in June, underscored our commitment to being a responsible leader and to delivering our purpose: "Supporting the prosperity of all". We are confident that our strategic focus on being China Anchored, Globally Connected and Technology Empowered will enable us to go from strength to strength, underpinning our continued success as the global markets leader in the Asian time zone. We will stay ever diligent given the uncertainties and challenges ahead, and we will continue to work closely together with our customers, partners, regulators and other stakeholders in supporting and maintaining Hong Kong's position as a leading global international financial centre.

Lastly, I would like to express my heartfelt thanks to our shareholders for their unwavering support and trust, and to all our dedicated staff for their relentless efforts during these testing times.

Laura M CHA
Chairman

MANAGEMENT DISCUSSION AND ANALYSIS

BUSINESS REVIEW

Overview

Fig. 1 – Market activity and Group's revenue and other income/(loss)

HKEX's business performed well in 1H 2020, recording record revenue and other income and profit despite the challenging macroeconomic and market backdrop. Headline ADT⁴ rose to \$117.5 billion, 20 per cent above 1H 2019, and 52 per cent above 2H 2019. Stock Connect saw record half-yearly revenue and other income in 1H 2020 as both Northbound and Southbound Trading volumes reached record half-yearly highs. HKEX ranked second globally by number of IPOs, welcoming 64 new company listings in 1H 2020.

Revenue and other income for 1H 2020 rose by 2 per cent against 1H 2019 and reached a half-yearly record high of \$8.8 billion. The increase in trading and clearing fees was partly offset by the fair value losses on collective investment schemes of \$138 million (which saw record gains of \$535 million in 1H 2019) due to global market corrections in March. Operating expenses increased by 6 per cent compared with the prior period, mainly due to annual payroll adjustments and increased headcount arising from the acquisition of BayConnect in June 2019, higher IT and computer maintenance expenses for new IT systems and upgraded networks, and higher professional fees incurred for strategic projects and other business initiatives.

For Q2 2020, revenue and other income also reached a quarterly record high of \$4.8 billion, up 19 per cent against Q1 2020. Despite the 6 per cent lower ADT against Q1 2020, this was more than offset by the rebound of the collective investment schemes, which recorded gains of \$383 million (as opposed to losses of \$521 million in Q1 2020), and the seasonal increases in depository, custody and nominee services fees.

In response to continued macro uncertainties, the Group maintained its focus on delivering upon the initiatives set out under its Strategic Plan 2019-2021, whilst continuing to adopt a prudent approach to cost control and risk management. We remain vigilant, and we are fully focused on our resiliency and responsiveness to the continuing global uncertainties; we will look to update and refresh our procedures and activities to adapt to the changing landscape as needed.

	8,782	6,706	8,578	6,625

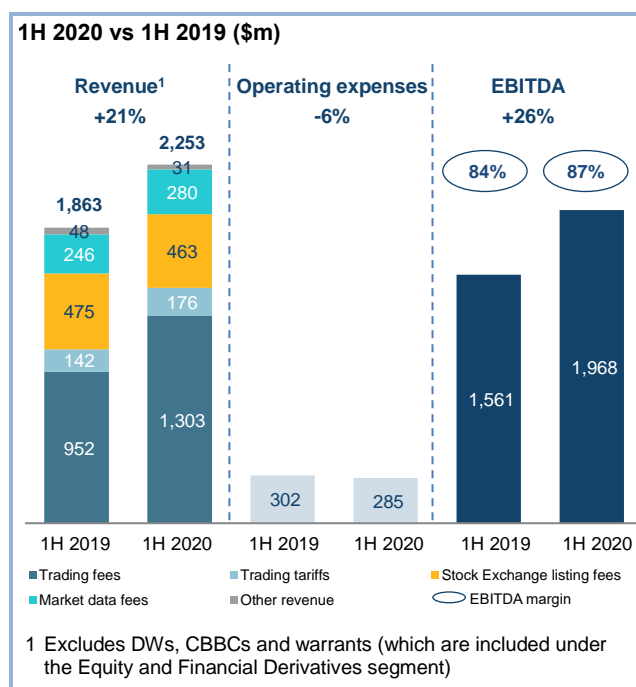

Cash Segment

Analysis of Results

Trading fees increased by 37 per cent compared with 1H 2019, more than the 33 per cent rise in equity products' ADT. This was primarily due to record fees from Stock Connect Northbound Trading of \$175 million (1H 2019: \$110 million), and the increase in number of trading days. Trading tariffs rose by 24 per cent, driven by the increase in equity products' trading.

Stock Exchange listing fees dropped by \$12 million, attributable to a \$17 million decrease in initial listing fees from fewer forfeitures, partly offset by a \$5 million increase in annual listing fees from a higher number of listed companies.

Operating expenses decreased by 6 per cent due to lower allocated costs of the Listing Division to this segment. This reflects the decrease in listing fees from equities, compared with the increase in listing fees from DWs and CBBCs, which are under the Equity and Financial Derivatives segment.

Business Update

Despite the COVID-19 outbreak which has led to widespread impact on the global economy, the Hong Kong Cash Market remained resilient and saw significant growth in 1H 2020 compared with 1H 2019, with headline ADT up 20 per cent to \$117.5 billion.

Stock Connect experienced strong flows in both Southbound and Northbound Trading in 1H 2020, with record half-yearly turnover. Northbound Trading ADT was RMB74.3 billion, 69 per cent higher than 1H 2019; and Southbound Trading ADT was \$20.7 billion, 86 per cent higher than 1H 2019. Southbound Trading turnover reached a daily record high of \$46.3 billion on 19 March 2020. As a result, Stock Connect generated record half-yearly revenue and other income of \$743 million (1H 2019: \$508 million), of which \$578 million (1H 2019: \$356 million) arose from trading and clearing activities.

On 13 January 2020, the investor identification regime for Southbound Trading was successfully launched, facilitating enhanced market surveillance and orderly operation of Stock Connect.

On 11 May 2020, HKEX introduced first phase enhancements to the Hong Kong Cash Market Volatility Control Mechanism (VCM). Phase 1 enhancements, which include further securities coverage expansion and tiered triggering thresholds, further strengthen the stock-level safeguards during extreme price volatility, and reflect changes in international practice and regulatory guidance. As at 30 June 2020, six VCM triggers had been recorded and all market operations have been smooth. Phase 2 enhancements, which allow multiple triggers, are subject to market operations' review to be conducted six months after the launch of Phase 1.

Hong Kong continues to be an attractive market for issuers, with strong growth in healthcare companies seeking a listing, and in the overall number of sizeable listings. In 1H 2020, HKEX welcomed 64 listed companies (including the secondary listing of NetEase, Inc. and JD.com, Inc.), raising a total of \$92.8 billion, ranking second globally⁵ by number of IPOs and third globally⁵ by IPO funds raised.

During 1H 2020, HKEX expanded its outreach and engagement with issuers and market participants through various digital channels, conducting a range of innovative new "virtual listing ceremonies". A series of biotech webinars were also hosted in May.

Our Exchange Traded Products (ETPs) business had a buoyant 1H 2020. ADT of ETPs, which includes ETFs and L&I Products, surged to \$7.1 billion in 1H 2020 (1H 2019: \$5.3 billion). In particular, L&I Products saw a strong uptick in investor interest, with ADT more than quadrupling from \$379 million in 1H 2019 to \$1.8 billion in 1H 2020. On 22 May 2020, the turnover of L&I Products reached a daily record high of \$5.1 billion.

On 1 June 2020, HKEX introduced a new spread table and continuous quoting market making obligations to enhance the liquidity of ETPs. In addition, the first Iron Ore Futures ETF, commodity-based L&I Product, active equity ETF, and the first four A share L&I Products were listed in 2020.

On 15 May 2020, the HKSAR Government published a new regulation to waive the stamp duty on stock transfers for ETP market makers when creating and redeeming ETP units. The regulation, which came into effect on 1 August 2020, helps to lower the transaction cost of ETP activities in the primary market.

Bond Connect reached its 3rd anniversary in July 2020, and has seen various enhancements across the onboarding, trading, and settlement segments since its debut. The enhancements include the launch of block trade allocation, real-time Delivery versus Payment, and Primary Market Information Platform, in addition to further clarification of tax policies. Meanwhile, the mutual market access scheme has gained strong recognition from the international market and foreign investors, with robust growth in terms of trading volume, foreign holdings, and the number of registered investors. In 1H 2020, ADT reached a new record half-yearly high of RMB19.9 billion, tripling that of 1H 2019, and ADT reached a monthly record high of RMB26.0 billion in May 2020. At 30 June 2020, the overall foreign investor holdings in the China Interbank Bond Market's domestic debt securities rose to RMB2,507.5 billion, and the total number of approved institutional investors increased to 2,012, up 15 per cent and 26 per cent from 31 December 2019 respectively. In 1H 2020, Bond Connect welcomed its first investors from Finland and Russia, further expanding its coverage to 33 jurisdictions.

To further enhance Bond Connect scheme, in July 2020, the People's Bank of China announced four new measures including fee reduction, trading hour extension, expansion of trading platforms, and primary market service offering enhancements.

In June 2020, HKEX announced plans to launch the HKEX Sustainable and Green Exchange (STAGE). This pioneering new information platform is the first-of-its kind in Asia, and will act as a central hub for data and information on sustainable and green finance investments in the region. STAGE will promote the visibility, transparency, and accessibility of sustainable and green finance across asset class and product type, and will also act as a valuable education and advocacy platform, promoting knowledge sharing and stakeholder engagement in sustainable finance.

The Stock Exchange published consultation papers during 2020 on the following topics:

Consultation papers	Consultation period end date
• Corporate WVR Beneficiaries	31 May 2020
• Proposals to Introduce a Paperless Listing & Subscription Regime, Online Display of Documents and Reduction of the Types of Documents on Display	24 September 2020
• Review of Listing Rules relating to Disciplinary Powers and Sanctions	9 October 2020

In addition, the Stock Exchange published the following guidance materials during 1H 2020:

Guidance materials

- Joint statements with the SFC in relation to (i) listed issuers' results announcements and (ii) general meetings in light of the Prevention and Control of Disease (Prohibition on Group Gathering) Regulation
- New guidance materials for pre-revenue biotech companies, providing prospective issuers and the market with more clarity on the listing requirements and disclosures
- A Listed Issuer Regulation Newsletter which contains observations based on issuers' recent announcements of business updates, and guidance on best practices in making disclosures in the current environment in light of COVID-19
- Environmental, Social and Governance (ESG) guidance materials including an e-training course, a new guide for board and directors and the step-by-step ESG reporting guidance
- Updated Disciplinary Procedures to provide further flexibility for the Listing Committee to determine non-cooperation cases in an expeditious manner
- An updated Statement on Settlement of Disciplinary Matters to provide information relating to the criteria for and benefits of settlement of enforcement action
- Four new Listing Decisions on (i) the minimum market capitalisation requirement under Main Board Listing Rules 8.09(2) after a proposed spin-off and (ii) guidance on why the Stock Exchange rejected and returned certain listing applications

Equity and Financial Derivatives Segment

Analysis of Results

ADV of derivatives contracts traded on the Futures Exchange⁶ was marginally higher than 1H 2019. Derivatives trading fees of the Futures Exchange, however, decreased by 7 per cent due to a lower proportion of higher fee contracts traded in 1H 2020, including HSI futures and options, partly offset by more trading days.

Trading fees and trading tariffs of DWs, CBBCs and warrants dropped by 8 per cent compared with 1H 2019, less than the 23 per cent decrease in ADT and the 10 per cent decrease in total number of trades, attributable to higher trading fees received from new issues of DWs and CBBCs.

Stock Exchange listing fees increased by 25 per cent, as the number of newly listed CBBCs reached a half-yearly record high of 18,920 in 1H 2020.

Operating expenses increased by 5 per cent due to higher allocated costs of the Listing Division, reflecting the increase in listing fees from DWs and CBBCs compared with the decrease in listing fees from equities.

⁶ Excludes London Metal Mini Futures, Gold Futures, Silver Futures and Iron Ore Futures contracts (which are included under the Commodities segment)

Business Update

Driven by the increased volatility, ADV of derivatives contracts traded on the Futures Exchange was 671,833⁶ contracts in 1H 2020, 8 per cent higher than the full year 2019.

Trading volume in the After-Hours Trading (T+1) Session continued to grow, with ADV reaching 119,307⁶ contracts in 1H 2020, 45 per cent and 40 per cent higher than the full year 2019 and 1H 2019 respectively. The number of equity index futures and options traded in the T+1 Session reached a daily record high of 303,482 contracts on 18 March 2020. In addition, the trading volume of four equity derivatives contracts (Mini HSI Futures, Hang Seng China Enterprises Index Futures, Mini Hang Seng China Enterprises Index Futures and HSI Options) reached half-yearly record highs in the T+1 Session during 1H 2020.

The RMB currency derivatives market went through a general risk-off period as a result of the COVID-19 outbreak, before regaining momentum in June 2020. Open interest of USD/CNH Futures contracts at 30 June 2020 saw a growth of 4 per cent from 31 December 2019, as investors increasingly utilised the contracts to manage their risk exposures.

The INR/USD Futures contracts established new daily records multiple times in 1H 2020, including the latest daily record high of 5,035 contracts on 2 March 2020. By the end of June 2020, a total of 98,725 contracts had been traded since their launch on 4 November 2019. To facilitate further development of the INR Currency Futures market, additional contract months were added to INR/USD Futures and INR/CNH Futures in June and July respectively.

To provide more investment options and risk management tools for investors on newly listed shares, HKEX facilitated the launch of futures and options of NetEase, Inc. and JD.com, Inc. on their share debut dates on 11 June and 18 June respectively. Trading of the two stocks and their related derivatives products has been active, reflecting a strengthened product ecosystem.

HKFE signed a licensing agreement with MSCI Inc. on 27 May 2020 to license a suite of MSCI indexes in Asia and Emerging Markets for the introduction of 37 futures and options contracts in Hong Kong. 33 futures contracts were introduced throughout July and August 2020. This suite of futures and options contracts represents a major step forward in the expansion of HKEX's derivatives product portfolio and significantly adds to the breadth and depth of the Hong Kong markets.

Enhancements were made to our Derivatives Block Trade facilities. Effective from 8 June 2020, futures only Block Trade orders, where all legs individually meet the applicable Minimum Volume Threshold, can be aggregated to facilitate greater operational efficiency for EPs. Furthermore, a new arrangement was introduced to facilitate the entry of negotiated Block Trades into the Hong Kong Futures Automated Trading System (HKATS) in the event of a market contingency situation.

As the world's leading structured products market, HKEX has been working with market

participants to simplify workflow and enhance market efficiency. In response to the market demands and recommendations from the Financial Services Development Council, HKEX reduced the structured product listing cycle from five to three trading days, effective from 13 July 2020. The new listing cycle enhances market efficiency on product issuance, and increases product choices for investors.

Commodities Segment

Analysis of Results

Chargeable ADV of metals contracts traded on the LME in 1H 2020 increased by 1 per cent compared with 1H 2019, as higher volumes in March 2020 was largely offset by decreased volumes in Q2 2020, as financial users took a “risk-off” approach in response to COVID-19 uncertainty. LME trading fees, however, increased by \$61 million (12 per cent) due to the fee increment effective from 1 January 2020.

Operating expenses increased by 2 per cent due to higher IT maintenance expenses, partly offset by lower marketing expenses.

Business Update

Due to the threat of COVID-19 and in accordance with guidance from the UK Government, the LME has maintained its suspension of trading on the LME Ring; and the temporary shift to electronic pricing remains in effect. The LME has taken steps to ensure that the LME and LME Clear can continue to operate a fully functioning and orderly market. The LME continues to monitor the evolving situation and will also liaise with relevant industry bodies and regulators as appropriate.

Several of the cash-settled futures contracts launched in 2019 continued to see active trading volumes. In 1H 2020, 47,495 lots of LME Steel Hot-Rolled Coil (HRC) Free On Board (FOB) China and 13,415 lots of LME Steel HRC North America were traded. The LME intends to introduce additional cash-settled futures contracts, including a lithium contract to serve the needs of the growing battery materials sector, and additional steel contracts.

New rules aimed at optimising the LME’s warehousing network (including off-warrant stock reporting requirements), which came into effect on 1 February 2020, have yielded constructive results. The LME continues to monitor the efficiency of its warehouse network to ensure that it is operating effectively. In particular, the warehouse network continues to provide an effective storage mechanism during the current

economic slowdown with total stocks rising 19 per cent as at 30 June 2020 as compared to 31 December 2019. On 15 June 2020, the LME further released a market-wide discussion paper on its proposal to introduce an electronic warranting process which streamlines the warrant lodgement and withdrawal process, and is expected to provide significant operational efficiencies for users.

On 1 July 2020, the LME issued a market-wide discussion paper regarding the proposed development of its electronic options market and is seeking views on its plans to simplify and standardise some areas of its market structure in order to support the enhancement of its options market.

In Hong Kong, USD and CNH Silver Futures contracts were successfully launched on 8 June 2020 to complement the precious metals product suite. A total of 6,790 contracts of CNH Gold Futures and 59,045 contracts of USD Gold Futures were traded in 1H 2020, with 841 kilograms of gold physically settled against futures contracts. In addition, a total of 66,826 contracts of USD-denominated London Aluminium / Copper / Zinc / Lead / Tin / Nickel Mini Futures and 54,333 contracts of Iron Ore Futures were traded in 1H 2020.

In light of the uncertainties around the COVID-19 situation, LME Asia Week 2020 was cancelled and replaced by a successful virtual event in July 2020, where discussions focused on the global economy, market trends and issues facing the metals industry.

As Mainland China gradually resumes activities, trading turnover in Q2 2020 at QME has reignited, reaching a quarterly record high of RMB1.6 billion, bringing the total trading volume in 1H 2020 to RMB2.2 billion. This was largely driven by more extensive client outreach, an upgraded product offering and enhancements to the trading and settlement processes. QME's warehouse warrant system is being upgraded to support financing with warrants as underlying collaterals. In June, QME was granted a license to launch natural gas products, adding energy as a major product suite in addition to base metals.

Post Trade Segment

Analysis of Results

Clearing and settlement fees for the Cash Market and for Settlement Instructions (SIs) increased by 23 per cent and 20 per cent respectively. The increases were primarily driven by a higher number of transactions, and record fees from Stock Connect Northbound Trading of \$301 million (1H 2019: \$185 million).

Clearing fees for LME Clear rose by 9 per cent, mainly due to the fee increment effective from 1 January 2020.

Depository, custody and nominee services fees decreased by \$24 million (4 per cent), mainly due to lower scrip fees and stock withdrawal fees, partly offset by higher e-IPO service fees and Stock Connect portfolio fees. Lower scrip fees were attributable to fewer companies declaring dividends in 1H 2020 compared with 1H 2019.

Other revenue increased by \$53 million, mainly due to an increase in accommodation income arising from HKCC CPs placing more Euro and Japanese Yen as collateral, and higher interest shortfall collected from LME Clear CPs on collateral, as USD investment return fell below the benchmark interest rate stipulated in the rules of LME Clear.

Net investment income dropped by \$2 million, with the decrease in Margin Fund investment income mostly offset by the increase in Clearing House Fund investment income. Margin Fund investment income fell due to higher interest rebate payable to HKCC and SEOCH Participants for HKD margins collateral effective from 2 September 2019, but partly offset by increase in average fund sizes of Margin Funds arising from higher margin requirements per contract.

The analysis of net investment income is as follows:

	<u>Six months ended 30 Jun 2020</u>			<u>Six months ended 30 Jun 2019</u>		
	Margin Funds \$m	Clearing House Funds \$m	Total \$m	Margin Funds \$m	Clearing House Funds \$m	Total \$m

- Exchange losses	(5)	-	(5)	(1)	-	(1)
Total net investment income	714	58	772	729	45	774
Average fund size (\$bn)	151.7	16.3	168.0	130.1	12.2	142.3
Annualised net investment return	0.94%	0.71%	0.92%	1.12%	0.75%	1.09%

Operating expenses increased by 3 per cent reflecting increases in staff costs due to annual payroll adjustments.

Business Update

With the China A shares weight increase in FTSE Russell Indexes and MSCI China A shares rebalancing, the utilisation of Stock Connect clearing facilities continued to grow, with an 82 per cent increase in average daily value of Northbound SIs in 1H 2020 compared with 1H 2019; and the number of Special Segregated Accounts increased by 11 per cent to 10,641 accounts as at 30 June 2020 (31 December 2019: 9,564). In addition, Northbound portfolio value of A shares as at 30 June 2020 increased by 18 per cent to RMB1,687 billion compared with 31 December 2019.

On 20 April 2020, HKSCC further enhanced its third party clearing arrangement to allow a CCASS CP to continue to self-clear its Exchange Trades, while appointing a General Clearing Participant for clearing its China Connect Securities Trades.

On 10 July 2020, a new Master Special Segregated Account service was offered to fund managers, asset managers and investment managers to further enhance the trading efficiency of Stock Connect.

In June 2020, HKEX announced the launch of a fully-automated solution for Large Open Positions Report (LOPR) submission in Q3 2020 to further enhance client experience. Leveraging the Secure File Transfer Protocol facility, CPs will be able to automate their current LOPR submission process.

OTC Clear's Cross Currency Swaps clearing volume for 1H 2020 was up 24 per cent compared with 1H 2019, due to increased capital market activities resulting from lower yields in the money market and interest rate cuts. Total clearing volume for 1H 2020, however, decreased by 18 per

cent to US\$86 billion (1H 2019: US\$105 billion) due to reduced clearing flow on HKD Interest Rate Swaps. Driven by the need to mitigate counterparty risk, some clearing members have started to clear long dated USD/CNH Deliverable FX via OTC Clear. In addition, a new milestone on OTC Clear was achieved in June 2020 in which The Hongkong and Shanghai Banking Corporation Limited cleared its first Interest Rates Swap transactions for clients.

Technology Segment

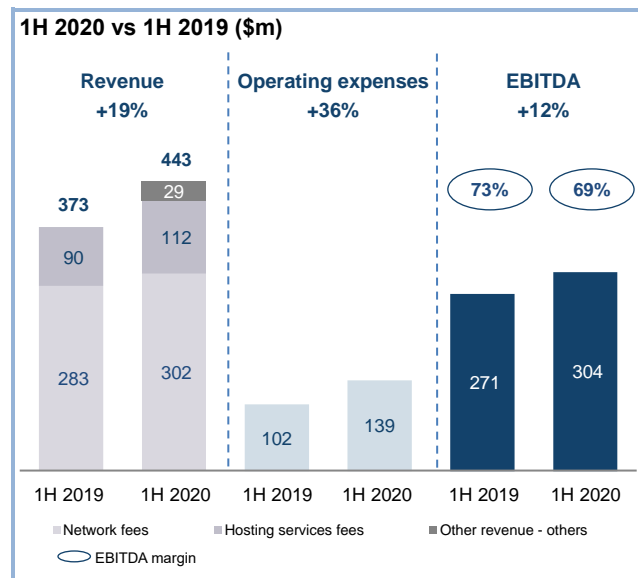

Analysis of Results

During the period, network fees rose by 7 per cent due to increased usage of the Orion Central Gateway and China Connect Central Gateway by EPs.

Hosting services fees rose by 24 per cent, compared with 1H 2019, due to organic growth from both new customer subscriptions and increased usage by existing customers.

Other revenue of \$29 million represented IT service income generated by BayConnect in 1H 2020, a 51 per cent subsidiary acquired in June 2019.

Operating expenses increased primarily due to inclusion of operating expenses of BayConnect.

Business Update

During 1H 2020, despite the market volatility, all HKEX major trading, clearing, settlement and market data dissemination systems for the Cash, Derivatives and Commodities Markets continued to perform reliably.

The project for hardware obsolescence replacement for various trading and clearing systems and the relocation of the Chinachem secondary data centre (CES DC), which was kicked off in early 2020, has been progressing well. After project completion, estimated in Q3 2021, the aging CES DC will be relocated to a Tier 3 data centre with a higher level of resilience and lower operating costs.

The review of the derivatives market trading suspension on 5 September 2019 was concluded in 1H 2020. Taking into account the recommendations from an independent consultant, feedback from market participants and other key stakeholders, HKEX has formulated and agreed with the SFC a range of enhancements that will support participants, investors and other stakeholders in the event of future incidents. It is expected that the enhancements, which focus on the ability to prevent, detect, monitor, handle and mitigate the impact of market incidents, and to improve incident communications, will significantly reduce risk and improve the ability to manage any future incidents.

HKEX continues to enhance testing services in the securities market for EPs. Starting from March 2020, an Orion Central Gateway Production-Lite testing environment and an additional testing time window for the existing end-to-end testing environment have been made available to EPs, providing a more realistic and flexible testing environment.

In 1H 2020, HKEX acquired a minority stake in Huakong TsingJiao Information Science (Beijing) Limited (TsingJiao) for a total consideration of RMB100 million. TsingJiao specialises in the research and development of multi-party computation technologies, which allows collaborative data analysis without revealing private data during the computation and analysis process. HKEX believes that partnering with TsingJiao is one of the building blocks to realise HKEX's vision of building a data marketplace.

1 See Financial Review section for further details

Corporate Funds net investment income in 1H 2020 fell \$679 million compared with 1H 2019, principally due to the fair value losses on collective investment schemes held under the external portfolio due to the market corrections in Q1, as opposed to the gains in 1H 2019.

The fair value change on collective investment schemes in 1H 2020 versus 1H 2019 mainly came from funds invested in public equities and multi-sector fixed income (public equities – 1H 2020: losses of \$246 million, 1H 2019: gains of \$300 million; multi-sector fixed income – 1H 2020: losses of \$42 million, 1H 2019: gains of \$99 million). As the valuation of the external portfolio reflects movements in market prices, fair value gains or losses may fluctuate or reverse until the investments are sold.

Operating expenses increased by 14 per cent against 1H 2019 due to higher IT expenses and professional fees incurred for strategic projects and other business initiatives, and increased staff costs from annual payroll adjustments.

Business Update

Following an initial capital investment of \$50 million for a minority equity interest in Fusion Bank Limited in 2019, HKEX made a further capital injection of \$50 million in 1H 2020 to facilitate the business launch preparation. Upon the completion of this investment, HKEX's total investment in Fusion Bank Limited is \$100 million, and its shareholding remains unchanged.

Expenses, Other Costs and Taxation

Operating Expenses

	Six months ended 30 Jun 2020 \$m	Six months ended 30 Jun 2019 \$m	Change
Staff costs and related expenses	1,398	1,328	5%
IT and computer maintenance expenses	315	278	13%
Premises expenses	59	64	(8%)
Product marketing and promotion expenses	17	29	(41%)
Professional fees	66	37	78%
Other operating expenses	221	217	2%
Total	2,076	1,953	6%

Staff costs and related expenses increased by \$70 million (5 per cent) mainly due to annual payroll adjustments and increased headcount arising from the acquisition of BayConnect in June 2019.

IT and computer maintenance expenses increased by \$37 million (13 per cent), attributable to higher maintenance expenses for new IT systems and upgraded networks, as well as the inclusion of BayConnect.

Professional fees increased by \$29 million (78 per cent), due to higher fees incurred for strategic projects and other business initiatives.

Depreciation and Amortisation

	Six months ended 30 Jun 2020 \$m	Six months ended 30 Jun 2019 \$m	Change
Depreciation and amortisation	545	495	10%

Depreciation and amortisation increased by \$50 million (10 per cent), attributable to an increase in depreciation of right-of-use assets of \$22 million from new and renewed office leases in 1H 2020, and increase in depreciation and amortisation of new IT systems completed in 2H 2019 and 1H 2020.

During 1H 2020, the Group incurred capital expenditure⁷ of \$519 million, an increase of 41 per cent from 1H 2019.

Finance Costs

	Six months ended 30 Jun 2020 \$m	Six months ended 30 Jun 2019 \$m	Change
Finance costs	96	86	12%

Finance costs increased due to higher negative interest charges on deposits in Euro and Japanese Yen, collected from CPs as collateral.

⁷ Capital expenditure excludes right-of-use assets recognised under HKFRS 16: Leases.

Taxation

	Six months ended 30 Jun 2020 \$m	Six months ended 30 Jun 2019 \$m	Change
Taxation	870	847	3%

Taxation increased due to a one-off deferred tax charge of \$61 million arising from the change of statutory UK tax rate, from 17 per cent to 19 per cent. Excluding such impact, taxation decreased by \$38 million or 4 per cent due to higher non-taxable income.

FINANCIAL REVIEW

Financial Assets and Financial Liabilities by Funds

	At 30 Jun 2020 \$m	At 31 Dec 2019 \$m	Change
Financial assets			
Cash and cash equivalents	129,563	128,152	1%
Financial assets measured at fair value through profit or loss	67,790	57,401	18%
Financial assets measured at fair value through other comprehensive income	5,046	4,569	10%
Financial assets measured at amortised cost	58,208	40,672	43%
Total	260,607	230,794	13%

The Group's financial assets comprised financial assets of Corporate Funds, Margin Funds, Clearing House Funds, base, ferrous, and precious metals derivatives contracts, and cash prepayments and collateral for A shares traded under Stock Connect, as follows:

	At 30 Jun 2020 \$m	At 31 Dec 2019 \$m	Change
Financial assets			
Corporate Funds ¹	30,783	29,138	6%
Margin Funds ²	152,027	137,012	11%
Clearing House Funds	16,883	15,176	11%
Base, ferrous, and precious metals derivatives contracts	60,914	48,008	27%
Cash prepayments and collateral for A shares	-	1,460	(100%)
Total	260,607	230,794	13%

1 Includes \$1,030 million (31 December 2019: \$818 million) solely used for supporting contributions to default funds and default fund credits for HKSCC Guarantee Fund, SEOCH Reserve Fund and HKCC Reserve Fund

2 Excludes Settlement Reserve Fund and Settlement Guarantee Fund paid to ChinaClear and margin receivable from CPs of \$7,531 million (31 December 2019: \$5,524 million), which are included in accounts receivable, prepayments and other deposits

	At 30 Jun 2020 \$m	At 31 Dec 2019 \$m	Change
Financial liabilities			
Base, ferrous, and precious metals derivatives contracts	60,914	48,008	27%
Margin deposits, Mainland security and settlement deposits, and cash collateral from CPs	159,558	142,536	12%
CPs' contributions to Clearing House Funds	16,076	14,394	12%
Total	236,548	204,938	15%

The increase in financial assets and financial liabilities of Margin Funds at 30 June 2020 compared to 31 December 2019 was mainly attributable to increased contributions required from HKCC, SEOCH and HKSCC CPs due to higher margin requirements from heightened volatility, and the increase in Mainland security and settlement deposits from HKSCC CPs attributable to the increase in Stock Connect Northbound Trading.

The increase in financial assets and financial liabilities of Clearing House Funds at 30 June 2020 compared to 31 December 2019 was mainly attributable to higher contributions required from HKSCC CPs in response to changes in risk exposures.

Financial assets of Corporate Funds increased by \$1,645 million during 1H 2020 due to the retention of cash generated by the business over the past 6 months, partly offset by the cash paid for the 2019 second interim dividend.

A portion of the Corporate Funds is invested in collective investment schemes which are designed to enhance returns and mitigate portfolio volatility and asset concentration risk. At 30 June 2020, the amounts invested in collective investment schemes amounted to \$6.7 billion, a decrease of 29 per cent against 31 December 2019, reflecting a net redemption of \$2.5 billion made during 1H 2020 (of which \$0.3 billion was subsequently received in July), and fair value losses of \$138 million. Further details of the amounts invested in collective investment schemes are as follows:

Asset class	At 30 Jun 2020 \$m	At 31 Dec 2019 \$m	Change
Public Equities	1,540	2,440	(37%)
Absolute Return	1,441	1,604	(10%)
Multi-Sector Fixed Income	1,941	2,583	(25%)
US Government Bonds and Mortgage-backed Securities ¹	1,744	2,716	(36%)
Total	6,666	9,343	(29%)

¹ Includes \$838 million invested in money market funds

Working Capital, Financial Resources and Gearing

Working capital rose by \$2,728 million or 11 per cent to \$26,986 million at 30 June 2020 (31 December 2019: \$24,258 million). The increase was primarily due to the profit of \$5,233 million generated during 1H 2020, partly offset by the 2019 second interim dividend (net of scrip dividend) of \$2,333 million paid in April 2020, and net increase in non-current assets of \$181 million.

At 30 June 2020, the Group's outstanding borrowings represented written put options to non-controlling interests of \$421 million (31 December 2019: \$418 million). As a result, the Group had a gross gearing ratio (ie, gross debt divided by adjusted capital) of 1 per cent (31 December 2019: 1 per cent), and a net gearing ratio (ie, net debt divided by adjusted capital) of zero per cent (31 December 2019: zero per cent). For this purpose, gross debt is defined as total borrowings (excluding lease liabilities) and net debt⁸ is defined as gross debt less cash and cash equivalents of Corporate Funds (excluding those reserved for supporting contributions to default funds and default fund credits for Clearing House Funds), and adjusted capital as all components of equity attributable to shareholders other than designated reserves.

Banking facilities have been put in place for contingency purposes. At 30 June 2020, the Group's total available banking facilities for its daily operations amounted to \$21,221 million (31 December 2019: \$21,246 million), which included \$14,720 million (31 December 2019: \$14,745 million) of committed banking facilities and \$6,500 million (31 December 2019: \$6,500 million) of repurchase facilities.

The Group has also put in place foreign exchange facilities for its daily clearing operations and for

⁸ Net debt is zero when the amount of cash and cash equivalents of Corporate Funds (excluding those reserved for supporting contributions to default funds and default fund credits for Clearing House Funds) is higher than gross debt.

the RMB Trading Support Facility to support the trading of RMB stocks listed on the Stock Exchange. At 30 June 2020, the total amount of the facilities was RMB25,000 million (31 December 2019: RMB21,500 million).

In addition, the Group has arranged contingency banking facilities amounting to RMB13,000 million (31 December 2019: RMB13,000 million) for settling payment obligations to ChinaClear should there be events that disrupt normal settlement arrangements for Stock Connect.

At 30 June 2020, 87 per cent (31 December 2019: 74 per cent) of the Group's cash and cash equivalents were denominated in HKD or USD.

Capital Expenditure and Commitments

During 1H 2020, the Group incurred capital expenditure⁷ of \$519 million (1H 2019: \$368 million) mainly related to the development and upgrade of various trading and clearing systems, and the relocation of Chinachem secondary data centre (CES DC).

The Group's capital expenditure commitments at 30 June 2020, including those authorised by the Board but not yet contracted for, amounted to \$1,255 million (31 December 2019: \$1,217 million). They were mainly related to the development and upgrade of IT systems including the cash, derivatives and commodities trading and clearing systems, and the setup of the new secondary data centre to replace CES DC.

Significant Investments Held, Material Acquisitions and Disposals of Subsidiaries, and Future Plans for Material Investments or Capital Assets

During 1H 2020, HKEX made an additional capital injection of HK\$50 million in Fusion Bank Limited. After the injection, HKEX's total investment in Fusion Bank Limited becomes HK\$100 million.

In 1H 2020, HKEX completed the acquisition of a minority stake in Huakong TsingJiao Information Science (Beijing) Limited for a total consideration of RMB100 million.

Save for those disclosed in this announcement, there were no other significant investments held, nor were there any material acquisitions or disposals of subsidiaries during the period under review. Apart from those disclosed in this announcement, there were no material investments or additions of capital assets authorised by the Board at the date of this announcement.

Pledges of Assets

LME Clear receives securities, gold bullion and warrants as collateral for margins posted by its CPs. The total fair value of this collateral was US\$1,523 million (HK\$11,804 million) at 30 June 2020 (31 December 2019: US\$1,872 million (HK\$14,586 million)). LME Clear is obliged to return this non-cash collateral upon request when the CPs' collateral obligations have been substituted with cash collateral or otherwise discharged.

LME Clear also holds securities as collateral in respect of its investments in overnight triparty reverse repurchase agreements under which it is obliged to return equivalent securities to the counterparties at maturity of the reverse repurchase agreements. The fair value of this collateral was US\$8,478 million (HK\$65,708 million) at 30 June 2020 (31 December 2019: US\$8,904 million (HK\$69,378 million)).

The above non-cash collateral, which LME Clear is permitted to sell or repledge in the absence of default by the counterparties, was not recorded on the condensed consolidated statement of financial position of the Group at 30 June 2020. Such non-cash collateral, together with certain financial assets amounting to US\$513 million (HK\$3,979 million) at 30 June 2020 (31 December 2019: US\$474 million (HK\$3,692 million)), have been repledged to LME Clear's investment agent and custodian banks under first floating charge and security arrangements for the settlement and

depository services they provide in respect of the collateral and investments held. The floating charge could convert to a fixed charge in the event of contract termination, or default or insolvency of LME Clear.

Exposure to Fluctuations in Exchange Rates and Related Hedges

The functional currencies of the Hong Kong and PRC entities are either HKD or RMB and the functional currency of the LME entities is USD. Foreign currency risks arise mainly from the Group's investments and bank deposits in currencies other than HKD and USD and the GBP expenditure of the LME entities.

Forward foreign exchange contracts and foreign currency bank deposits may be used to hedge the currency exposure of the Group's non-HKD and non-USD assets and liabilities and highly probable forecast transactions to mitigate risks arising from fluctuations in exchange rates.

Foreign currency margin deposits received by the Group in Hong Kong are mainly hedged by investments in the same currencies, and unhedged investments in USD may not exceed 20 per cent of the Margin Funds. For LME Clear, investments of Margin Fund and Default Fund will generally be in the currency in which cash was received.

The aggregate net open foreign currency positions (excluding collective investment schemes) at 30 June 2020 amounted to HK\$3,452 million, of which HK\$74 million were non-USD exposures (31 December 2019: HK\$1,744 million, of which HK\$150 million were non-USD exposures).

Contingent Liabilities

At 30 June 2020, the Group's material contingent liabilities were as follows:

- (a) The Group had a contingent liability in respect of potential calls to be made by the SFC to replenish all or part of compensation less recoveries paid by the Unified Exchange Compensation Fund established under the repealed Securities Ordinance up to an amount not exceeding \$71 million (31 December 2019: \$71 million). Up to 30 June 2020, no calls had been made by the SFC in this connection.
- (b) The Group had undertaken to indemnify the Collector of Stamp Revenue against any underpayment of stamp duty by its Participants of up to \$200,000 for each Participant. In the unlikely event that all of its 646 trading Participants (31 December 2019: 658) covered by the indemnity at 30 June 2020 defaulted, the maximum contingent liability of the Group under the indemnity would amount to \$129 million (31 December 2019: \$132 million).
- (c) HKEX had given an undertaking in favour of HKSCC to contribute up to \$50 million in the event of HKSCC being wound up while it is a wholly-owned subsidiary of HKEX or within one year after HKSCC ceases to be a wholly-owned subsidiary of HKEX, for payment of the liabilities of HKSCC contracted before HKSCC ceases to be a wholly-owned subsidiary of HKEX, and for the costs of winding up.

CHANGES SINCE 31 DECEMBER 2019

There were no other significant changes in the Group's financial position or from the information disclosed under Management Discussion and Analysis in the annual report for the year ended 31 December 2019.

REVIEW OF FINANCIAL STATEMENTS

The Audit Committee has reviewed the Group's Unaudited Condensed Consolidated Financial Statements for the six months ended 30 June 2020 in conjunction with HKEX's external auditor. Based on this review and discussions with the management, the Audit Committee was satisfied that the Unaudited Condensed Consolidated Financial Statements were prepared in accordance with applicable accounting standards and fairly present the Group's financial position and results for the six months ended 30 June 2020.

COMPLIANCE WITH CORPORATE GOVERNANCE CODE

Throughout the six months ended 30 June 2020, HKEX complied with all code provisions and, where appropriate, adopted the recommended best practices set out in the Corporate Governance Code, with the exceptions of Code Provisions A.4.1 (re-election of non-executive directors) and A.4.2 (retirement by rotation of directors).

The Government Appointed Directors, all being Non-executive Directors, are not subject to election or re-election by Shareholders as their appointments are governed by the SFO. HKEX's Chief Executive in his capacity as a Director is also not subject to retirement by rotation, as his term on the Board is coterminous with his employment with HKEX under HKEX's Articles of Association.

PURCHASE, SALE OR REDEMPTION OF HKEX'S LISTED SECURITIES

During the six months ended 30 June 2020, neither the Company nor any of its subsidiaries purchased, sold or redeemed any HKEX shares, except that the trustee of the Share Award Scheme, pursuant to the terms of the rules and trust deed of the Share Award Scheme, purchased on the Stock Exchange a total of 9,700 HKEX shares at a total consideration of \$3 million.

SUSTAINABLE WORKPLACE

During the six months ended 30 June 2020, the Group organised 36 in-house courses for employees to enhance their job knowledge, skills and well-being. Moreover, the Group sponsored a total of 64 employees to attend external training.

As at 30 June 2020, the Group had 2,439 employees, including 233 temporary staff. HKEX's remuneration policy has remained unchanged since the date of the 2019 Annual Report.

Details of HKEX's principles and practices related to governance and sustainability are set out in the Corporate Governance and Corporate Social Responsibility sections of the HKEX Group website.

NOTES TO THE CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

1. Basis of Preparation and Accounting Policies

These unaudited condensed consolidated financial statements should be read in conjunction with the 2019 annual consolidated financial statements. The accounting policies and methods of computation used in the preparation of these unaudited condensed consolidated financial statements are consistent with those used in the annual consolidated financial statements for the year ended 31 December 2019.

The financial information relating to the year ended 31 December 2019 that is included in these unaudited condensed consolidated financial statements for the six months ended 30 June 2020 as comparative information does not constitute the statutory annual consolidated financial statements of the Company for that year but is derived from those consolidated financial statements. Further information relating to these statutory financial statements required to be disclosed in accordance with section 436 of the Hong Kong Companies Ordinance (Chapter 622) is as follows:

The Company has delivered the consolidated financial statements for the year ended 31 December 2019 to the Registrar of Companies as required by section 662(3) of, and Part 3 of Schedule 6 to, the Hong Kong Companies Ordinance (Chapter 622).

The Company's auditor has reported on those consolidated financial statements. The auditor's report was unqualified; did not include a reference to any matters to which the auditor drew attention by way of emphasis without qualifying its report; and did not contain a statement under sections 406(2), 407(2) or (3) of the Hong Kong Companies Ordinance (Chapter 622).

2. Adoption of new/revised HKFRSs

In 2020, the Group has adopted the following amendments to HKFRSs which are pertinent to the Group's operations and effective for accounting periods beginning on or after 1 January 2020:

Amendments to HKAS 1 and HKAS 8	Presentation of Financial Statements and Accounting Policies, Changes in Accounting Estimates and Errors: Definition of Material
Amendments to HKFRS 3	Business Combination: Definition of a Business

The adoption of these amendments did not have any financial impact on the Group.

3. Operating Segments

The Group determines its operating segments based on the internal management reports that are used to make strategic decisions reviewed by the chief operating decision-maker.

The Group has five reportable segments ("Corporate Items" is not a reportable segment). The segments are managed separately as each segment offers different products and services and requires different IT systems and marketing strategies.

The operations in each of the Group's reportable segments are as follows:

The **Cash** segment covers all equity products traded on the Cash Market platforms, the Shanghai Stock Exchange and the Shenzhen Stock Exchange through Stock Connect, sales of market data relating to these products and other related activities. The major sources of revenue of the segment are trading fees, trading tariffs, listing fees of equity products and market data fees.

The **Equity and Financial Derivatives** segment refers to derivatives products traded on the Stock Exchange and the Futures Exchange and other related activities. These include the provision and maintenance of trading platforms for a range of equity and financial derivatives products, such as stock and equity index futures and options, DWs, CBBCs and warrants, and sales of related market data. The major sources of revenue are trading fees, trading tariffs, listing fees of derivatives products and market data fees.

The **Commodities** segment refers to the operations of the LME, which operates an exchange in the UK for the trading of base, ferrous, and precious metals futures and options contracts, and the operations of QME, the commodity trading platform in the Mainland. It also covers the commodities contracts traded on the Futures Exchange. The major sources of revenue of the segment are trading fees of commodity products, commodity market data fees and fees from ancillary operations.

The **Post Trade** segment refers to the operations of the five clearing houses, namely HKSCC, SEOCH, HKCC, OTC Clear and LME Clear, which are responsible for clearing, settlement and custodian activities of the exchanges of the Group and Northbound trades under Stock Connect, and clearing and settlement of OTC derivatives contracts. Its principal sources of revenue are derived from providing clearing, settlement, depository, custody and nominee services and net investment income earned on the Margin Funds and Clearing House Funds.

The **Technology** segment refers to all services in connection with providing users with access to the platform and infrastructure of the Group, and services provided by BayConnect. Its major sources of revenue are network, terminal user, data line and software sub-license fees and hosting services fees.

Central income (including net investment income of Corporate Funds) and central costs (costs of central support functions that provide services to all operating segments and other costs not directly related to any operating segment) are included as "Corporate Items".

The chief operating decision-maker assesses the performance of the operating segments principally based on their EBITDA.

An analysis by operating segment of the Group's EBITDA, profit before taxation and analysis of revenue by timing of revenue recognition for the period, is set out as follows:

Six months ended 30 Jun 2020							
	Cash \$m	Equity and Financial Derivatives \$m	Commodities \$m	Post Trade \$m	Technology \$m	Corporate Items \$m	Group \$m
Timing of revenue recognition:							
Point in time	1,491	1,076	616	2,586	30	-	5,799

Depreciation and amortisation	(64)	(48)	(158)	(120)	(19)	(86)	(495)
Finance costs	(8)	(6)	(4)	(39)	(1)	(28)	(86)
Share of profits less losses of joint ventures	9	(3)	-	-	-	-	6
Reportable segment profit before taxation	1,498	1,283	208	2,683	251	127	6,050

4. Net Investment Income

	Six months ended 30 Jun 2020 \$m	Six months ended 30 Jun 2019 \$m
Gross interest income from financial assets measured at amortised cost	1,311	1,549
Gross interest income from financial assets measured at fair value through other comprehensive income	32	52
Interest rebates to Participants	(329)	(623)
Net interest income	1,014	978
Net (losses)/gains including interest income on financial assets mandatorily measured at fair value through profit or loss and financial liabilities at fair value through profit or loss	(138)	535
Others	(38)	6
Net investment income	838	1,519

5. Finance Costs

	Six months ended 30 Jun 2020 \$m	Six months ended 30 Jun 2019 \$m
Interest on borrowings	3	4
Interest on lease liabilities	46	44
Banking facility commitment fees	26	25
Negative interest on Euro and Japanese Yen deposits	21	13
	96	86

6. Taxation

Taxation charge in the condensed consolidated income statement represents:

	Six months ended 30 Jun 2020 \$m	Six months ended 30 Jun 2019 \$m
Current tax – Hong Kong Profits Tax	724	744
Current tax – Overseas Tax	104	102
Total current tax	828	846
Deferred tax (note (b))	42	1
Taxation charge	870	847

- (a) Hong Kong Profits Tax has been provided at the rate of 16.5 per cent (2019: 16.5 per cent) and overseas profits tax at the rates of taxation prevailing in the countries in which the Group operates, with the average corporation tax rate applicable to the subsidiaries in the UK being 19 per cent (2019: 19 per cent).
- (b) Through the enactment of the Finance Act 2020, the UK Corporate Tax rate would remain at 19 per cent from 1 April 2020 instead of reducing to 17 per cent, the previously enacted rate. As a result, a one-off deferred tax charge of \$61 million was recognised during the six months ended 30 June 2020.

7. Earnings Per Share

The calculation of the basic and diluted earnings per share is as follows:

- (a) Basic earnings per share

	Six months ended 30 Jun 2020	Six months ended 30 Jun 2019
Profit attributable to shareholders (\$m)	5,233	5,205
Weighted average number of shares in issue less shares held for Share Award Scheme (in '000)	1,260,758	1,250,719
Basic earnings per share (\$)	4.15	4.16

- (b) Diluted earnings per share

	Six months ended 30 Jun 2020	Six months ended 30 Jun 2019
Profit attributable to shareholders (\$m)	5,233	5,205
Weighted average number of shares in issue less shares held for Share Award Scheme (in '000)	1,260,758	1,250,719
Effect of shares awarded under Share Award Scheme (in '000)	3,172	3,010
Weighted average number of shares for the purpose of calculating diluted earnings per share (in '000)	1,263,930	1,253,729
Diluted earnings per share (\$)	4.14	4.15

8. Dividends

	Six months ended 30 Jun 2020 \$m	Six months ended 30 Jun 2019 \$m
Interim dividend declared of \$3.71 (2019: \$3.72) per share at 30 Jun	4,704	4,680
Less: Dividend for shares held by Share Award Scheme at 30 Jun	(12)	(12)
	4,692	4,668

9. Financial Assets

	At 30 Jun 2020 \$m	At 31 Dec 2019 \$m
Cash and cash equivalents	129,563	128,152
Financial assets measured at fair value through profit or loss	67,790	57,401
Financial assets measured at fair value through other comprehensive income	5,046	4,569
Financial assets measured at amortised cost	58,208	40,672
	260,607	230,794

The Group's financial assets comprised financial assets of cash prepayments and collateral for A shares (Cash for A shares), Corporate Funds, Margin Funds, Clearing House Funds and metals derivatives contracts as follows:

	At 30 Jun 2020 \$m	At 31 Dec 2019 \$m
<u>Cash for A shares (note (a))</u>		
Cash and cash equivalents	-	1,460
<u>Corporate Funds</u>		
Cash and cash equivalents (note (b))	12,113	11,421
Financial assets measured at fair value through profit or loss	6,876	9,393
Financial assets measured at amortised cost	11,794	8,324
	30,783	29,138
<u>Margin Funds¹</u>		
Cash and cash equivalents	100,567	100,095
Financial assets measured at fair value through other comprehensive income	5,046	4,569
Financial assets measured at amortised cost	46,414	32,348
	152,027	137,012
<u>Clearing House Funds</u>		
Cash and cash equivalents	16,883	15,176
<u>Metals derivatives contracts</u>		
Financial assets measured at fair value through profit or loss	60,914	48,008
	260,607	230,794

1 Excludes Settlement Reserve Fund and Settlement Guarantee Fund paid to ChinaClear and margin receivable from CPs of \$7,531 million (31 December 2019: \$5,524 million), which are included in accounts receivable, prepayments and deposits. If such amounts are included, total Margin Funds would be \$159,558 million (31 December 2019: \$142,536 million).

The expected maturity dates of the financial assets are analysed as follows:

	At 30 Jun 2020						At 31 Dec 2019					
	Cash for A shares \$m	Corporate Funds \$m	Margin Funds \$m	Clearing House Funds \$m	Metals derivatives contracts \$m	Total \$m	Cash for A shares \$m	Corporate Funds \$m	Margin Funds \$m	Clearing House Funds \$m	Metals derivatives contracts \$m	Total \$m
Within twelve months	-	29,250	152,027	16,883	60,914	259,074	1,460	27,748	137,012	15,176	48,008	229,404
Over twelve months	-	1,533	-	-	-	1,533	-	1,390	-	-	-	1,390
	-	30,783	152,027	16,883	60,914	260,607	1,460	29,138	137,012	15,176	48,008	230,794

- (a) Cash for A shares includes:
- (i) RMB cash prepayments received by HKSCC from its CPs for releasing their allocated A shares on the trade day. Such prepayments will be used to settle HKSCC's Continuous Net Settlement (CNS) obligations payable on the next business day; and
 - (ii) HKD/USD cash collateral received by HKSCC from its CPs for releasing their allocated A shares on the trade day. Such collateral will be refunded to the CPs when they settle their RMB CNS obligations on the next business day.
- (b) At 30 June 2020, cash and cash equivalents of Corporate Funds of \$1,030 million (31 December 2019: \$818 million) were solely used to support Skin-in-the-Game and default fund credits for HKSCC Guarantee Fund, SEOCH Reserve Fund and HKCC Reserve Fund.

10. Accounts Receivable, Prepayments and Deposits

The Group's accounts receivable, prepayments and deposits mainly represent the Group's CNS money obligations receivable, and Settlement Reserve Fund and Settlement Guarantee Fund paid to ChinaClear, which accounted for 54 per cent (31 December 2019: 73 per cent) and 36 per cent (31 December 2019: 21 per cent) of the total accounts receivable, prepayments and deposits respectively. CNS money obligations receivable mature within two days after the trade date. The balance of Settlement Reserve Fund and Settlement Guarantee Fund with ChinaClear is rebalanced on a monthly basis. Fees receivable are due immediately or up to 60 days depending on the type of services rendered. The majority of the remaining accounts receivable, prepayments and deposits were due within three months.

11. Accounts Payable, Accruals and Other Liabilities

The Group's accounts payable, accruals and other liabilities mainly represent the Group's CNS money obligations payable, which accounted for 80 per cent (31 December 2019: 89 per cent) of the total accounts payable, accruals and other liabilities. CNS money obligations payable mature within two days after the trade date. The majority of the remaining accounts payable, accruals and other liabilities would mature within three months.

12. Borrowings

	At 30 Jun 2020 \$m	At 31 Dec 2019 \$m
Written put options to non-controlling interests	421	418
Analysed as:		
Non-current liabilities	81	80
Current liabilities	340	338
	421	418

During the six months ended 30 June 2020, none of the written put options was exercised.

INTERIM DIVIDEND AND CLOSURE OF REGISTER OF MEMBERS

The Board has declared an interim dividend of \$3.71 per share for the year ending 31 December 2020, payable in cash. The Group actively and regularly reviews and manages its capital structure. Having reviewed HKEX's corporate fund position, its expected capital requirements, projected operating cash flows, projected capital expenditures and strategic investment opportunities, the Board has decided not to offer scrip alternative for the interim dividend declared for the year ending 31 December 2020 and all subsequent dividends declared, until otherwise determined.

Relevant Dates for Interim Dividend Payment

Ex-dividend date	1 September 2020
Closure of HKEX's Register of Members	3 to 4 September 2020 (both dates inclusive)
Record date	4 September 2020
Despatch of dividend warrants	15 September 2020

To qualify for the interim dividend, all properly completed transfer forms accompanied by the relevant share certificates must be lodged for registration with HKEX's registrar, Hong Kong Registrars Limited, at Shops 1712-1716, 17th Floor, Hopewell Centre, 183 Queen's Road East, Wan Chai, Hong Kong no later than 4:30 pm on Wednesday, 2 September 2020.

PUBLICATION OF 2020 INTERIM RESULTS AND INTERIM REPORT

This announcement is published on the HKEXnews website at www.hkexnews.hk and the HKEX Group website at www.hkexgroup.com/Investor-Relations/Regulatory-Disclosure/Announcements/2020. The 2020 Interim Report will be available on the HKEXnews and HKEX Group websites and despatched to Shareholders on or about Thursday, 3 September 2020.

By Order of the Board
Hong Kong Exchanges and Clearing Limited
David Fu
Group Company Secretary

Hong Kong, 19 August 2020

As at the date of this announcement, HKEX's Board of Directors comprises 12 Independent Non-executive Directors, namely Mrs Laura May-Lung CHA (Chairman), Mr Apurv BAGRI, Mr CHAN Tze Ching, Ignatius, Mr CHEAH Cheng Hye, Mrs CHOW WOO Mo Fong, Susan, Ms FUNG Yuen Mei, Anita, Mr Rafael GIL-TIENDA, Dr HU Zuli, Fred, Mr HUNG Pi Cheng, Benjamin, Mr LEUNG Pak Hon, Hugo, Mr John Mackay McCulloch WILLIAMSON, and Mr YIU Kin Wah, Stephen, and one Executive Director, Mr LI Xiaojia, Charles, who is also the Chief Executive of HKEX.

GLOSSARY

ADT	Average daily turnover value
ADV	Average daily volume (in number of contracts/lots)
BayConnect	BayConnect Technology Company Limited
Board	HKEX's board of directors
Bond Connect	A mutual bond market access programme between Hong Kong and Mainland China, under which Northbound trading enables overseas investors to invest in the China Interbank Bond Market, and Southbound trading will be explored at a later stage
Cash Market	HKEX's securities related business excluding stock options
CBBCs	Callable Bull/Bear Contracts
CCASS	Central Clearing and Settlement System
ChinaClear	China Securities Depository and Clearing Corporation Limited
CNH	Offshore RMB traded outside Mainland China
Corporate Governance Code	Refers to Appendix 14 to the Main Board Listing Rules
CP(s)	Clearing Participant(s)
Derivatives Market	HKEX's derivatives related business including stock options
Director(s)	HKEX's director(s)
DWs	Derivative warrants
e-IPO	Electronic Initial Public Offering
